TECHNICAL SCOPE

PHP, HTML, CSS, JavaScript, Jquery, SQL

Drupal 7, Git, GitLab, MySQL workbench

Linux, nginx, apache, samba

WORK EXPERIENCE

Dohn Joe LTD, London
August 2019-Present

Full stack web developer maintaining and devloping bespoke sites for business use or general information. I spent time sorting out bugs and adding new features.

Using a CRM called Drupal made it easy for clients to update and give new content to their sites. Having a solid version control, GitLab, allows us to properly track projects using included tickets manager, merge requests and regular commits.

Being a full stack requires using Linux systems and setting up a webserver with Nginx for testing purposes before moving them onto AWS to host our sites.

Starting off as an apprentice, I went through on-site training to gain **Software Development Technician Level 3** and was further employed to present day.

Technical scope: Drupal 7, PHP, HTML, CSS, JavaScript, JQuery, SQL, MySQL workbench, Git, GitLab, Nginx, Linux

EDUCATION
- BCS lvl 3 in Programming
- BCS lvl 3 in Software development context and methodologies

- GCSE Maths 7
- GCSE English 4
- GCSE Combined science 5
- GCSE Business studies 5
